

## **CTU G UPDATES AND GUIDELINES**

### **As of Block 8- January 18<sup>th</sup>, '22**

CTU-G continues to be an acute medicine service, but with no or limited housestaff.

The following modifications have been made to accommodate this change:

- Cap of 15 patients
  - The team will take their own bouncebacks even if they are at 'cap'
  - Attending may increase cap at their discretion
- Maximum of 2 admissions overnight
  - \*No D4 Admissions overnight\*
- No D4 admissions in general , except:
  - If a CTU-G ward patient is transferred to D4, the CTU-G Attending will decide if that patient is transferred to another team, or remain on G.
- CTU-E will preferentially admit longer stay patients to G in the mornings as long as G has capacity
- Procedures- contact Senior in ED after 1pm to determine most appropriate team/availability for procedures for G patients (this allows juniors on other CTU teams to have the opportunity to perform and learn procedures)
