

CTU G UPDATES AND GUIDELINES

CTU-G continues to be an acute medicine service, but now has limited house staff. Given the changes to resident coverage, the following modifications have been made:

- Cap of 20 patients
 - The team will take their own bouncebacks even if they are at 'cap'
- Maximum of 3 admissions overnight
 - Typically will be completed by the Extra-ER
- No cap on total number of admissions per day
- D4 admissions continue to be accepted by this team
- Depending on G census, CTU-E will preferentially admit longer stay patients to CTU-G in the mornings
- Drip model continues whereby R1/CC3 admit only to their own teams overnight (except for any E appropriate patients). Extra-ER admits max 3 patients to G and then helps with other admissions/reviewing with juniors
