

Interstitial Lung Disease (ILD) Fellowship Program

Queen's University

The ILD program at Queen's University and Kingston Health Sciences Center was established in 2013. It is a 12 month Program that provides intensive training in the diagnosis and management of interstitial lung diseases. ILD Fellows have rotations in Rheumatology, Advanced Dyspnea Clinic and Thoracic Surgery. The Program includes monthly ILD journal club, ILD-Rheumatology sessions and ILD rounds with multidisciplinary discussions involving Respiriology, Chest Radiology and Lung Pathology.

As of 2019 we are pleased to offer the Ruth Pattenden Fellowship, which provides financial support (equivalent to that of PGY5 Canadian trainees) to ILD Fellows accepted into the Program, with the expectation to also dedicate time to ILD research.

Applicants must hold a certification in Internal Medicine and must have obtained -or be on track to obtain- certification in Adult Respiriology.

Applications should be submitted to Ms. Sarah Oddell (sarah.oddell@queensu.ca) and to Dr. Onofre Moran (morano@queensu.ca) and should include:

- Application Letter (free format)
- CV
- Copy of MD and specialist certification (Internal Medicine and /or Respiriology)
- 3 Reference letters, at least one from the Respiriology Program Director and from the Internal Medicine Program Director.

Deadline to apply for the academic year July 2024-June 2025 is September 29, 2023
